DETAILED ACTION

1. During a telephone interview initiated by the undersigned examiner on October 12, 2007, Mr. Francis J. Maguire (applicant's attorney) was informed that in the office action mailed on July 31, 2006, the previous examiner made a restriction/election of species requirement and in response thereto, dated July 23, 2007, applicant had elected, without prejudice, the Group II and Species I, which corresponds to claims 14 and 19. Currently claim 14 is generic. Thus, claims 16, 22, 25-26, 38-40 and 44-61 are withdrawn from consideration. Mr. Maguire agreed to the position taken by the undersigned examiner.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2629

3. Claims 14 and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Nack et al(5,317,689).

Nack et al disclose a digital visual simulation apparatus for generating realistic scenes comprising means for providing successive mixed optical images of an object space for presentation to a viewer's eye, each mixed optical image having a highly detailed component and a lesser detailed component (see figures 1a-1c; columns 4, lines 1-27; column 5, lines 8-15), means for changing analogously and passively the image content of selected successive mixed images such that highly detailed component (i.e., higher resolution) may be cast on the fovea of the retina of the viewer's eye and lesser detailed component (i.e., lower resolution) may be cast on at least the remainder of the retina of the viewer's eye wherein the highly detailed component is mobile with respect to the lesser detailed component (column 5, lines 33-51; column 7, lines 4-22; columns 8-10).

- 4. Applicant's arguments with respect to claims 14 and 19 have been considered but are most in view of the new ground(s) of rejection.
- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Deering and Zeevi et al are made of record to show various types of apparatus for generating realistic successive mixed optical images having both high and low resolutions.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mike Fatahiyar whose telephone number is (571)272-7688. The examiner can normally be reached on Monday-Friday from 9:30 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Hjerpe, can be reached on 571-272-7691. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
